Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-7, are rejected under 35 U.S.C. 102(e) as being anticipated by US 6864592 (Kelly).

Kelly discloses a floating unit for a sea power plant comprising a first float having a circular member 14 having an interior interacting with a second float 10 for generating electricity.

Claims 1, 4-7, are rejected under 35 U.S.C. 102(b) as being anticipated by US 3546473 (Rich).

Rich discloses a floating unit for a sea power plant comprising a first float having a circular member 8, 18, 24, having an interior interacting with a second float 4, 5, 28, for generating electricity.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3748

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 6864592 (Kelly). Kelly discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the configuration values as claimed. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to elect different configurations for the floats in Kelly for the purpose of achieving appropriate power output.

Claims 2-3 are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 3546473 (Rich). Rich discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the configuration values as claimed. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to elect different configurations for the floats in Rich for the purpose of achieving appropriate power output.

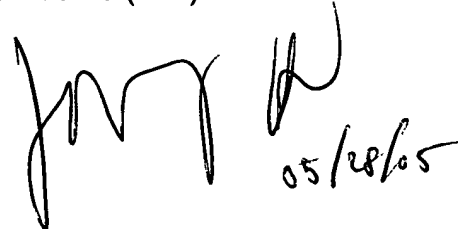

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Linderfelt, Dick, Konotchick, and Crickmer disclose floating units comprising a vertical spar float inside a circular float.
